## WEBBING LADDER

FERRETERRO web ladders comes up to 300 meter length with connectors

To make the ladder flexible to go up to any length required.

Different variety of rungs of Aluminum alloy or Carbon fiber makes them up to 3 time lighter in weight compared to P.P rope or manila rope ladders.

The non slip and load bearing pattern makes it best product to be used in confines spaces, mine access, scaffolding roofing, oil & gas tanks and lowering purpose. The weight carrying capacities can go up to 2 ton so it is most ideal ladder for rescue operations, paramilitary forces and mountaineering usages. Bright colour of webbing is for distant location and camouflage prints for army application.

## ADVANTAGES

- Lightweight
- Staggered rungs
- Rigid and reinforced
- Easy anchorage
- Easy installation
- Water & acid proof
- Spark resistant for gas chambers available on request
